

NOVEL MOLECULES OF THE CARD RELATED PROTEIN
FAMILY AND USES THEREOF

Abstract of the Disclosure

Novel CARD-5 polypeptides, proteins, and nucleic acid molecules are disclosed. In
5 addition to CARD-5 proteins, and the invention further provides CARD-5 fusion proteins,
antigenic peptides and anti-CARD-5 antibodies. The invention also provides CARD-5
nucleic acid molecules, recombinant expression vectors containing a nucleic acid molecule of
the invention, host cells into which the expression vectors have been introduced and
non-human transgenic animals in which a CARD-5 gene has been introduced or disrupted.
10 Diagnostic, screening and therapeutic methods utilizing compositions of the invention are
also provided.
